

More clarity. Less busywork.

All properties, requests and people in one place. HAUSV helps your team identify priorities and act faster.

**AI does the groundwork.
Your team decides.**

Requests. Simply handled.

AI INBOX

01 Bring requests together

Manage emails and call notes by property, status and assignee.

02 Get suggestions

AI suggests category, priority, assignment and a reply, using your response templates.

03 Review and move on

Review, adjust or approve. Then open the next case straight away.

YOU SET THE RULES

Manual / With approval / Automatic by category

One portal for everyday property management.

Daily operations

Notices, events and votes. Handle damage reports with photos and a clear history.

Documents & handovers

Share documents. Record handovers with photos, meter readings and keys.

Parking & integrations

Charging status and access rights. CAMT/ebInterface and data for your specialist systems.

Live energy insights

PV, grid, storage and loads at a glance. Identify energy flows and demand peaks.

Plan peak shaving

Compare flexible loads and storage in scenarios. Assess potential peak reduction before implementation.

Targeted device control

As a project extension: connect and test devices. Enable active control only with separate approval.

Roles by property and unit · Cloud or your infrastructure · Local AI setup on request

Let's start with one property.

Define the pilot scope, data and approvals together.
